

5 Simple Savers

5 Simple Savers

ways we can save energy together

CUT PRODUCTION WASTE

Minimize waste and improve production processes to reduce energy efficiency and production costs.

REPAIR LEAKS

Leaks in compressed air, refrigerant gas, vacuum systems, HVAC and building envelopes can be the largest sources of energy waste.

3 Keys to Discovery

BOOTS ON THE GROUND

Go to where the action is and watch the data. Get your feet wet with our equipment and processes every day.

EYES ON THE DATA

Energy itself isn't visible, but we can see things that tell us how it's being used. Looking at the data can help find opportunities that otherwise wouldn't be seen.

COMMON SENSE

Go to the source of the problem and use common sense. There's a lot of energy efficiency that can be gained by just looking at the problem and using common sense.

ENERGY350

TURN IT OFF

Equipment that's not doing any work should be turned off.

FIX & TUNE

Equipment operates most efficiently when all components are working and properly sized.

OPTIMIZE CONTROLS

Look to adjust equipment schedules, setpoints or sequencing to maximize efficiency.
